#### Monday

It's 11.55am and at 1pm you're usually used to having lunch at home. There is your husband at home whose name is Tommy and he is on his day off.

He has just returned from shopping and is putting away his purchases to start preparing for lunch.

You will be engaged in a call at 12 which should last an hour.

The call is about writing a paper with a very well-known professor (h index of 121) but known for his obsession with punctuality.

You are rested because you came from a relaxing weekend.

## SCENE INFO

17:40 🛇

The phone rings: it's your senior colleague Jim who organized the call. He calls out of breath because he can no longer find the call link and asks you for help. He says that he had organized it on Meet via his cell phone and now that he is on the PC he can no longer find it. If he comes in late on the call, he will never want to work with us. It's a miracle that he granted us this call and asks for your help in finding the link. How do you respond? You have a few seconds to respond.
